DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - a. In paragraph 7, line 2, "Rather than track memory" should be changed to --Rather than tracking memory--.
 - b. In paragraph 12, line 2, "Rather than have duplicate tags" should be changed to --Rather than having duplicate tags--.
 - c. In paragraph 14, line 3, "Cache-line-based" should be changed to --Cache-line-base--.

Appropriate correction is required.

Claim Objections

2. Claim 1 is objected to because of the following informalities: lines 29 and 31 recite "the chip-select portion of the snoop address", and "the interleave portion of the snoop address", respectively. However, it is noted that "the chip-select portion", and "the interleave portion" are part of the "cache-index portion". Therefore, "cache-index portion" should be inserted before --the snoop address--.

Appropriate correction is required.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feature of “a plurality of local processors for executing instructions and reading and writing data; and a plurality of local caches, coupled to the plurality of processors” recited in claim 2; the features of “a first local cache, coupled between the first processor and the snoop interconnect, for storing cache entries that each store a cache tag and data; and a second local cache, coupled between the second processor and the snoop interconnect, for storing cache entries that each store a cache tag and data” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The limitation "wherein the cache-index portion further comprises a snoop-index portion having the snoop index for selecting the selected snoop set, a chip-select portion, and an interleave portion" is not enabled by Applicant's disclosure in such manner as to enable one of ordinary skill in the art to make and use the same.

6. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to describe how in expanding the multi-

processor system, the number of address bits in the snoop-index portion of the snoop address could be decreased to increase the number of address bits in the chip-select portion.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 15-17 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 15 recites in lines 5-6 and 40 "Nth cluster", and claim 19 recites "N...snoop entries" in line 4. However, N is not defined in the claim and as claimed is broad and indefinite.

9. Claims 18-20 recites the limitation "first and second snoop tag partitions" in lines 11, 31, and 33. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

10. Claims 15-20 would be allowable if rewritten to overcome the rejection under 35 USC 112 second paragraph as being indefinite.
